Eastern Busway features

Panmure to Pakūranga completed

Rā Hihi – flyover

1 Pakūranga Town Centre

- Pakūranga Station close to Pakuranga Plaza
- urban design features to enhance the environment and create a welcoming space
- changes to local roads to improve connections and traffic flow
- Rā Hihi (Reeves Road) flyover separates local and through-traffic, improving journey time and reliability for buses and freight

Stations

- 4 new bus stations to provide shelter, scooter and cycle parking and CCTV to enhance security
- connection with local bus network
- waiting space for passengers with safe pedestrian crossing facilities on each side
- pick up and drop off zone at Pakūranga station

2 Tī Rākau Drive

- a central running busway with walking and cycling path on the outside of the traffic lanes
- 2 bus stations near Edgewater and Riverhills
- u-turns at traffic lights to enable local residents and users of side streets to travel east and west safely

Busway cross-section of Tī Rākau Drive

3 Tī Rākau Bridge

- 2 lane busway on the Pakūranga Heights (north) side
- separated walking and cycling path

4 Pōhatu

Burswood Station

- 2 lane busway and separated walking and cycling path

5 Botany link route at Whakamaumahara

- busway on low-level structure around stormwater pond
- separated walking and cycling path
- upgrades to existing Botany Town Centre bus shelters

Botany Town Centre

Key

- busway
- stations
- cycleway one-way
- cycleway two-way
