

Ti Rākau Drive to Botany

Draft design

Interim bus route (EB4i)
To be used until the link route receives funding and is built. Buses will travel in general traffic lanes

Signalised intersection

Link route (EB4L)
Preferred route that we are seeking consent for, so that it can be built when funding is available

Footpath and two-way cycleway will be built when funding is received

Upgrade to existing Botany Town Centre bus shelters

Future Botany Bus Station
Exact station location to be confirmed. It is likely to be close to the town centre

Busway on low-level structure around stormwater pond

Key

- busway
- shared path
- bus link route
- shared path link route
- interim bus route
